Title : Regulations Regarding International Students Undertaking Studies in Taiwan CH

Amended Date : 2023-09-18

Category : Ministry of Education (教育部)

Article 1 These Regulations are formulated in accordance with the provisions of Article 25, Paragraph 3 of the University Act, Article 32, Paragraph 1 of the Junior College Act, Article 41, Paragraph 1 of the Senior High School Education Act, and Article 30, Paragraph 1 of the Primary and Junior High School Act.

Article 2 A person of foreign nationality who has never held Republic of China ("R.O.C.") nationality and who meets the following requirements is permitted to apply for admission to an educational institution, in accordance with the provisions of these Regulations:

1. The person has never undertaken studies in Taiwan as an overseas compatriot student.
2. The person has not been given a placement in the current academic year by the University Entrance Committee for Overseas Compatriot Students in accordance with the Regulations Regarding Study and Counseling Assistance for Overseas Compatriot Students in Taiwan.

A person of foreign nationality who meets the following requirements and who in the immediate past has resided overseas continuously for at least six years is also permitted to apply for admission to an educational institution, in accordance with these Regulations. However, a person who plans to apply to study in a university department of medicine, dentistry, or Chinese medicine must have resided overseas continuously for at least eight years.

1. A person who at the time of their application also holds dual R.O.C. nationality shall have

never had household registration in Taiwan.

2. A person who before the time of their application also held dual R.O.C. nationality but no longer does at the time of their application shall have renounced their R.O.C. nationality with the approval of the Ministry of the Interior on a date at least eight full years before making their application.

3. A person referred to in either of the preceding two subparagraphs shall meet the requirements stipulated in Subparagraph 1 and Subparagraph 2 of the previous paragraph.

A foreign national who was selected by a foreign government, organization, or school to study in Taiwan in accordance with the Education Cooperation Framework Agreement, and who has never had household registration in Taiwan may be given exemption from the restrictions set out in the preceding two paragraphs if the competent education administrative authority gives approval.

The periods of six years and eight years stipulated in Paragraph 2 shall be calculated using the starting date of the semester (February 1, or August 1) as the end date of the period. The term “overseas” used in Paragraph 2 refers to countries or regions other than the Mainland Area, Hong Kong, and Macau; the term “reside overseas continuously” means that an international student has stayed in Taiwan for no more than a total of 120 days in each calendar year. When calculating the number of consecutive years spent overseas, if the initial or final year of the period is not a complete calendar year, any time spent in Taiwan in the initial or final year must not exceed 120 days. However, time that a person has spent in Taiwan is not subject to this restriction and it is not counted when calculating how long they were in Taiwan in a particular year if the person has documentary proof that they:

1. attended an overseas youth training course organized by the Overseas Compatriot Affairs Council or a technical professional training program accredited by the Ministry of Education;

2. spent a total period of less than two years undertaking Chinese language classes at a Chinese language center at a university or tertiary college which has Ministry of Education approval to recruit students overseas;
3. spent a total period of less than two years in Taiwan as an exchange student; or
4. spent a total period of less than two years undertaking an internship that they came to Taiwan to undertake with the approval of the designated central competent authority.

A person who held both foreign and R.O.C. nationalities and applied for annulment of their R.O.C. nationality before the date of effect of the February 1, 2011 amendment to these Regulations may apply for admission as an international student in accordance with the provisions in place before the amendment and is not subject to the restrictions set out in Paragraph 2.

Article 3 An applicant of foreign nationality, who is eligible for permanent residence in Hong Kong or Macao, who has never had household registration in Taiwan, and who at the time of their application has resided in Hong Kong, Macao, or elsewhere overseas continuously for at least six years may apply for admission in accordance with the provisions of these Regulations. However, a person who plans to apply to study in a university department of medicine, dentistry, or Chinese medicine must have resided overseas continuously for at least eight years.

The term “resided [...] continuously” in the preceding paragraph means that a person did not spend more than a total of 120 days in Taiwan in each calendar year. However, this restriction does not apply if a person can present documentary proof that any of the circumstances listed in Paragraph 5, Subparagraphs 1 to 4 of the previous article apply. The time that they spent in Taiwan in the ways listed is not counted when calculating the period of continuous residence referred to in the previous paragraph.

A person who was formerly from the Mainland Area

and who has foreign nationality and has never had household registration in Taiwan, and who at the time of their application has resided overseas continuously for at least six years may apply for admission to an educational institution, in accordance with the provisions of these Regulations. However, a person who plans to apply to study in a university department of medicine, dentistry, or Chinese medicine must have resided overseas continuously for at least eight years.

The term “resided [...] continuously” in the preceding paragraph means that a person did not spend more than a total of 120 days in Taiwan in each calendar year. However, this restriction does not apply if a person can present documentary proof that any of the circumstances listed in Paragraph 5, Subparagraphs 1 to 4 of the previous article apply. The time that they spent in Taiwan in the ways listed is not counted when calculating the period that they resided continuously overseas referred to in the previous paragraph.

The periods of six years and eight years stipulated in Paragraph 1 and in Paragraph 3 shall be calculated using the starting date of the semester (February 1, or August 1) as the end date of the period.

The definition of “overseas” given in Paragraph 5 of the previous article also applies, mutatis mutandis, to Paragraphs 1 to 4.

Article 4 An international student applying to study at an educational institution in Taiwan in accordance with the provisions of the two previous articles is limited to only applying once. If a student wants to continue studying in Taiwan, their application shall be handled in the same manner as the admission procedures for domestic students. However, this requirement does not apply to an international student in either of the following circumstances:

1. If an international student is applying for admission to a master's degree or higher level program after completing the course of study at

the educational institution to which they originally applied, the university to which the student is now applying shall handle the application in accordance with its regulations;

2. If an international student applied to come to Taiwan to undertake a bachelor's degree or lower level program in Taiwan and after coming to Taiwan stayed for less than one year for some reason then discontinued their studies or forfeited their student status, that student may lodge another application to come to Taiwan to study, but only one such re-application is permitted.

If an educational institution in Taiwan where an international student was studying considers that their conduct or academic performance was unsatisfactory, or if the student seriously violated any ordinances or the regulations of the educational institution and the circumstances were serious and as a result, in accordance with the provisions of its regulations governing student awards and penalties had to discontinue their studies or forfeited their status as a registered student, the student is not permitted to re-apply to study in Taiwan on the basis of the provisions of the previous paragraph.

Article 5 In principle, the actual number of places available for international students to be admitted to universities and two-year programs at junior colleges (hereunder referred to as "universities and tertiary colleges") is limited to an additional ten percent above the admission quota that was approved for the institution for the previous academic year by the Ministry of Education, and that number shall be incorporated into the total admission quota and reported to the Ministry of Education for approval. A university or junior college applying to recruit more than an additional ten percent shall submit a report of the planned increment (including associated quality control strategy and supportive measures) to the Ministry of Education for approval. Degree programs offered by collaborating domestic and foreign universities

that have been approved on a case by case basis by the Ministry of Education are not subject to this restriction.

The actual number of international students that may be admitted to a five-year program at a junior college, or to a senior secondary school, junior high school, or an elementary school is limited up to an additional ten percent above the admission quota that was approved for the institution for the previous academic year that was approved by the competent education administrative authority, and that number shall be included in the total number of students admitted for that academic year and be reported to the competent education administrative authority for approval.

Universities and tertiary colleges may augment the number of places at their institution available to international students by the number of places that were available to local students within the admission quota that was approved for the institution for the previous academic year and shall first report such an increase to the Ministry of Education for approval.

The admission quotas referred to in Paragraph 1 and Paragraph 2 do not include international students who are not officially registered as a current student.

Article 6 A university or tertiary college that recruits and admits international students into any year of its programs shall draw up its own related admission regulations to be made public and submit them to the Ministry of Education for approval. The contents shall include its recruitment method(s), admission eligibility review procedure, teaching language(s) used by departments (programs), student language proficiency criteria, proof of financial resources criteria, and other related matters. After the admission regulations referred to in the preceding paragraph have been approved by the Ministry of Education, each university or tertiary college shall formulate its own admission guidelines for international students

that give details of its recruitment method(s), admission eligibility review procedure, the departments (programs) that may admit international students, teaching language(s) used by each of those departments (programs), student language proficiency criteria, the maximum number of years in which each program must be completed, admission quotas, eligibility criteria to apply for admission, proof of financial resources criteria, tuition and miscellaneous fee collection and refund criteria, information about scholarships and/or grants provided by the educational institution, and other related matters.

Universities and tertiary colleges that handle the recruitment of international students are not permitted to commission any external institution, legal person, group, or individual to handle related matters except publicity and promotion, and to assist students coming to Taiwan undertake the necessary related procedures. In due course each university and tertiary college shall also verify whether any commissioned party has collected any unreasonable fees from international students, established any loan relationship with any international student, or whether any other violation of related ordinances has occurred, and when necessary, it may check details with international student(s) who are applying for admission.

When a university or tertiary college handles matters related to the admission of international students itself or it commissions an external institution, legal person, group, or individual to do so, it is not permitted to provide any information that is inconsistent with its admission regulations, admission guidelines, or any related regulations.

Article 7 International students applying for admission to a university or tertiary college shall submit the following documents and apply directly to the university or college during its designated application period, and applicants who pass the review or screening process will be issued an

Revised at the 135th Academic Affairs Meeting on May 12, 2025.

I. For the purpose of talent acquisition of international students, National Chung Cheng University (hereinafter referred to as this University) establishes the Guidelines in accordance with the provisions of Article 6 of the Ministry of Education's Regulations Regarding International Students Undertaking Studies in Taiwan.

II. A person of foreign nationality who has never held Taiwanese (R.O.C.) nationality and who meets the following requirements is permitted to apply for admission to this University in accordance with the provisions of the Guidelines:

(I) The person has never undertaken studies in Taiwan as an overseas compatriot student.

(II) The person has not been given a placement in the current academic year by the University Entrance Committee for Overseas Compatriot Students in accordance with the Regulations Regarding Study and Counseling Assistance for Overseas Compatriot Students in Taiwan.

A person of foreign nationality who meets the following requirements and who in the immediate past has resided overseas continuously for at least six years is also permitted to apply for admission to this University in accordance with the Guidelines:

- (I) A person who at the time of their application also holds dual Taiwanese (R.O.C.) nationality shall have never had household registration in Taiwan.
- (II) A person who before the time of their application also held dual Taiwanese (R.O.C.) nationality but no longer does at the time of their application shall have renounced their Taiwanese (R.O.C.) nationality with the approval of the Ministry of the Interior on a date at least eight full years before making their application.
- (III) A person referred to in either of the preceding two subparagraphs shall meet the requirements stipulated in Subparagraph 1 and Subparagraph 2 of the previous paragraph.

A foreign national who was selected by a foreign government, organization, or school to study in Taiwan in accordance with the Education Cooperation Framework Agreement, and who has never had household registration in Taiwan may be given exemption from the restrictions set out in the preceding two paragraphs if the Ministry of Education gives approval.

The periods of six years stipulated in Paragraph 2 shall be calculated using the starting date of the semester (February 1, or August 1) as the end date of the period.

The term “overseas” used in Paragraph 2 refers to countries or regions other than the Mainland China, Hong Kong, and Macau; the term “reside overseas continuously” means that an international student has stayed in Taiwan for no more than a total of 120 days in each calendar year. When calculating the number of consecutive years spent overseas, if the initial or final year of the period is not a complete calendar year, any time spent in Taiwan in the initial or final year must not exceed 120 days. However, time that a person has spent in Taiwan is not subject to this restriction and it is not counted when calculating how long they were in Taiwan in a particular year if the person has documentary proof that they:

- (I) attended an overseas youth training course organized by the Overseas Compatriot Affairs Council or a technical professional training program accredited by the Ministry of Education;
- (II) spent a total period of less than two years undertaking Chinese language classes at a Chinese language center at a university or tertiary college which has Ministry of Education approval to recruit students overseas;
- (III) spent a total period of less than two years in Taiwan as an exchange student; or
- (IV) spent a total period of less than two years undertaking an internship that they came to Taiwan to

undertake with the approval of the designated central competent authority.

A person who held both foreign and Taiwanese (R.O.C.) nationalities and applied for annulment of their Taiwanese (R.O.C.) nationality before the date of effect of the February 1, 2011 amendment to the Regulations Regarding International Students Undertaking Studies in Taiwan stipulated by Ministry of Education may apply for admission as an international student in accordance with the provisions in place before the amendment and is not subject to the restrictions set out in Paragraph 2.

III. An applicant of foreign nationality, who is eligible for permanent residence in Hong Kong or Macao, who has never had household registration in Taiwan, and who at the time of their application has resided in Hong Kong, Macao, or elsewhere overseas continuously for at least six years may apply for admission in accordance with the provisions of these Guidelines.

The term “resided [...] continuously” in the preceding paragraph means that a person did not spend more than a total of 120 days in Taiwan in each calendar year. However, this restriction does not apply if a person can present documentary proof that any of the circumstances listed in Subparagraphs 1 to 4, Paragraph 5 of the previous article apply. The time that they spent in Taiwan in the ways listed is not counted when calculating the period of continuous residence referred to in the previous paragraph.

A person who was formerly from the Mainland China and who has foreign nationality and has never had household registration in Taiwan, and who at the time of their application has resided overseas continuously for at least six years may apply for admission to this University in accordance with the provisions of these Guidelines.

The term “resided [...] continuously” in the preceding paragraph means that a person did not spend more than a total of 120 days in Taiwan in each calendar year. However, this restriction does not apply if a person can present documentary proof that any of the circumstances listed in Subparagraphs 1 to 4, Paragraph 5 of the previous article apply. The time that they spent in Taiwan in the ways listed is not counted when calculating the period that they resided continuously overseas referred to in the previous paragraph.

The periods of six years stipulated in Paragraph 1 and in Paragraph 3 shall be calculated using the starting date of the semester (February 1, or August 1) as the end date of the period.

The definition of “overseas” given in Paragraph 5 of the previous article also applies, mutatis mutandis, to Paragraphs 1 to 4.

IV. An international student applying to study at an educational institution in Taiwan in accordance with the provisions of the two previous articles is limited to only applying once. If a student wants to continue studying in Taiwan, their application shall be handled in the same manner as the admission procedures for domestic students. However, this requirement does not apply to an international student in either of the following circumstances:

(I) If an international student applies for admission to a master's degree or higher degree program after completing the course of study at the educational institution to which they originally applied, the university to which the student is now applying shall handle the application in accordance with this University's regulations.

(II) If an international student applied to come to Taiwan to undertake a bachelor's degree or a lower level program in Taiwan and after coming to Taiwan stayed for less than one year for some reason then discontinued their studies or forfeited their student status, that student may lodge another application to come to Taiwan to study, but only one such re-application is permitted.

V. In principle, the actual number of places available for international students to be admitted to this University is limited to an additional ten percent above the admission quota that was approved for this University for the previous academic year by the Ministry of Education, and that number shall be incorporated into the total admission quota and reported to the Ministry of Education for approval. This University that applies for more than an additional ten percent shall submit a report of the planned increment (including associated quality control strategy and supportive measures) to the Ministry of Education for approval. Degree programs offered by this University collaborating with foreign universities that have been approved on a case-by-case basis by the Ministry of Education are not subject to this restriction.

This University may augment the number of places at this University available to international students by the number of places that were available to local students within the admission quota that was approved for this University for the previous academic year and shall first report such an increase to the Ministry of Education for approval.

The admission quotas referred to in Paragraph 1 do not include international students who are not officially registered as a current student.

VI. This University that recruits and admits international students into any year of its programs shall draw up its own related admission regulations to be made public and submit them to the Ministry of Education for approval. The contents shall include its recruitment method(s), admission eligibility review procedure, teaching language(s) used by departments (programs), student language proficiency criteria, proof of financial resources criteria, and other related matters.

After the admission regulations referred to in this paragraph have been approved by the Ministry of Education, this University shall formulate its own admission guidelines for international students that give details of its recruitment method(s), admission eligibility review procedure, the departments (programs) that may admit international students, teaching language(s) used by each of those departments (programs), student language proficiency criteria, the maximum number of years in which each program must be completed, admission quotas, eligibility criteria to apply for admission, proof of financial resources criteria, tuition and miscellaneous fee collection and refund criteria, information about scholarships and/or grants provided by this University, and other related matters.

VII. This University may recruit international students in the Fall and the Spring semesters (for master and doctoral students only) every academic year. The enrollment schedule and method are expressly stated in the admission brochure and announced on the website of the Office of International Affairs at the University (hereinafter referred to as the International Affairs Office). International students may apply to the International Affairs Office at the University, which are limited to three departments or institutes for application. Applicants who intend to apply for the international student scholarships of this University should submit their applications at the same time as applying for admission to this University. The Application Procedure for International Student Scholarship shall be separately stipulated.

VIII. This University that handles the recruitment of international students is not permitted to commission any external institution, legal person, group, or individual to handle related matters except publicity and promotion, and to assist students coming to Taiwan in undertaking the necessary related procedures. If commissioning an external institution, legal person, group, or individual to handle related matters, this University shall verify whether any commissioned party has collected any unreasonable fees from international students, established any loan relationship with any international student, or whether any other violation of related ordinances has occurred, and when necessary, it may check details with international student(s) who are applying for admission.

When this University handles matters related to the admission of international students itself or it commissions an external institution, legal person, group, or individual to do so, it is not permitted to provide any information that is inconsistent with its admission regulations, admission guidelines, or any related regulations.

This University's recruitment promotion methods may include setting up an international student recruitment website, participating in the Taiwan Tertiary Education Fair, communicating with teachers and students from outstanding universities in various countries, shooting recruitment promotion videos, and using social media marketing.

However, academic credentials issued by a campus or branch that a foreign educational institution has established in Mainland China by a foreign educational institution shall be notarized by a notary public there and authenticated by an agency established or designated by the Executive Yuan, or by a private organization commissioned by the Executive Yuan.

If documents that have already been authenticated raise any doubt, this University may request an examination of the documents.

X. An international student who submits any certificate or document as part of their application for admission

to this University that is found to be forged, fabricated, or that has been altered in some way shall have their enrollment eligibility revoked. If the student has already registered and begun classes, their registration as a current student shall be cancelled and they will not be awarded any certification whatsoever regarding their related academic undertakings. If any such circumstances are first discovered after a student has already graduated, this University shall revoke the former student's eligibility to graduate and shall require any degree already awarded to be returned and shall rescind it.

XI. An international student who has completed a bachelor's degree or a higher degree in Taiwan and is applying to be admitted to do a master's degree program or a higher degree may submit copies of their graduation certificate from a university or tertiary college in Taiwan and transcripts for each year of their studies and apply in accordance with the provisions of Article 9 and is not subject to the provisions of Subparagraph 2, Paragraph 1, Article 9 hereof.

After successfully passing the assessment and recognition, it is forwarded to the department for which they applied to be reviewed by the department council meeting.
- (II) This University's medium of instruction is primarily Mandarin Chinese, and the applicant's basic language ability will be determined by each department during the review. After the review, each department may test the applicant's Chinese and English ability, if necessary, or ask the International Affairs Office to assist the department in conducting a video interview. The applicant will be notified to take the professional subject or Chinese language proficiency test.
- (III) The department that accepts the application shall submit the minutes of the department council meeting, the documents required by the applicant, and other forms to the International Affairs Office within the specified time. The International Affairs Office then compiles the review results and has them signed by the president for approval, as well as sending out the result notification.

XIII. All admitted students who have passed the review should reply to the International Affairs Office within the specified time to express their intention to study. The International Affairs Office shall compile the list of students, and issue admission permits and notify the admitted students of the admission.

Introduction	The Department of Chemistry and Biochemistry at the National Chung Cheng University (DC&BC-CCU) was founded in 1992 in the college of science. The Department is a comprehensive department granting

bachelor's, master's, and Ph.D. degrees. We are strongly committed to excellence in education and research in the fundamental chemical sciences, such as organic, bio, inorganic, analytical, physical chemistry, as well as exploring the connections between chemistry and the other natural sciences. To achieve this goal we have implemented two certificate programs in the biochemistry and material chemistry.

The Department currently has currently has 18 full-time faculty members and 4 staff members, over 140 graduate students and 200 undergraduate students. Every faculty member in the Department conducts active chemistry-related research covering a broad range of topics at the forefront of modern chemistry. Our brand-new department building was completed in the summer of 2007 to accommodate state-of-the-art laboratories, modern classrooms and ample space for meeting and discussion. The Department also provides a collection of cutting-edge shared equipments to help students advance their ideas and understanding of science.

The Department has a long-standing tradition of collaborative interactions in chemical research. Members from the Department are actively engaged in joint research programs with scientists in CCU campus and from other institutes and organizations. Because the multidisciplinary programs are organized around important new chemical areas, they ferment new ideas and lead naturally to cooperative or leveraged research efforts. Members of the Department have successfully obtained funding to establish the Center for Nano Bio-Detection, which focuses on nano-biosensing technology, and the Instrument Center, which serves as the core facility of the University.

For those of you who are interested in basic chemistry, or are passionate for scientific discovery, or have an appreciation for the unconventional and frontier research programs, you are most welcome to join us, or at least pay us a visit. We are located in a beautiful campus covered with Judas trees on an eastern hill of Min-Hsiung, Chia-Yi.

Curriculum planning

Teaching at the Department of Chemistry and Biochemistry is centered on the curriculum of traditional Chemistry, accompanied Biochemistry and Material Chemistry. The Department also offers optional programs of Biochemistry and Material Chemistry, which would guide students to

	acquire specialized skills and knowledge.
Future map	Bachelor of Science in Chemistry is a door-opening degree, which may lead to postgraduate study in Chemistry, Chemical Engineering, Biochemistry, Molecular Biology, Biomedicine, Pharmacy, Food Science and Environmental Science. There are ample career opportunities in the industry including, but not limited to, electrical devices, electro optical sensors, chemical engineering, material science, pharmaceuticals and biotechnology. Teaching is another obvious option. All in all, graduates of Chemistry and Biochemistry have exceptional job prospects and academic roadmap.

Introduction	As Taiwan enters the 21st century, the nation is experiencing rapid transformations in both its economic and political landscapes. These shifts have catalyzed significant changes in labor relations and

	<p>emerging labor issues. Labor research encompasses all facets of worker experiences and the dynamic interactions among employees, employers, and governmental institutions. Despite the growing importance of these topics, scholarly research on labor in Taiwan remains limited.</p> <p>To address this gap, the Institute of Labor Research was established in August 1991, followed by the founding of the Department of Labor Relations in August 1997 and the launch of the In-Service Master's Program in September 1999. These initiatives aim to cultivate a new generation of experts committed to advancing both theoretical and practical understanding of domestic labor relations and labor studies.</p>
